

The main logo for IEXPO. The letter "I" is filled with a blue and white geometric pattern of parallel lines and chevrons. To its left is a small, stylized line graph with a blue-to-green gradient. The letters "EXPO" are also filled with various blue and white patterns: concentric circles, overlapping circles, and geometric shapes. To the right of the "O" is another stylized line graph, similar to the one on the left, with a green-to-blue gradient.

ASF: ACCELERATING SUSTAINABILITY THROUGH EFFECTIVE MARKET DEMANDS

The last 5-8 years have seen an exponential increase in sustainability demands within public and private procurement. Taking responsibility for its size and position in the Nordic market, and its strong partnerships with leading IT brands, Atea wanted to spearhead acceleration in the IT sustainability journey by improving the focus, quality and precision of customer demand balancing customers' ambitions and industry possibilities.

Atea established Atea Sustainability Focus (ASF), a platform through which the Nordic market identifies the single most urgent priority for the industry to address and provides concrete recommendations to the industry.

Through an annual online survey and annual conference, the views of some 500 IT decision makers, procurers, and sustainability specialists. The results, summarized by a third party, were discussed by a group of IT and sustainability leaders at a meeting to define the yearly focus and a clear set of

ASF Report 2018 was delivered to the Responsible Business Alliance in January 2018 and discussed at the RBA Summit. This generated a constructive discussion around the need to establish a common reporting framework and address the most material issues facing the industry.
