The Meeting Experience from Barco

Remove any friction that prevents people from collaborating in a natural, intuitive way...

They have become more collaborative

User-centric tools are driving IT to think more about user experience

Bring your own device (BYOD) has become "the norm" in many enterprises

The need for out of the box and creative thinking is driving frequent collaboration

The digital divide – a gap between generations is being driven by technology

Being more productive, time management, work life balance

More and more meetings include remote participants

Poor meeting technology can causes problems

70% say technology failures can lead to a loss of credibility for the speaker or brand

55% over half report inefficiencies and time wasting

Over 1/3 over a third say it creates attendee anger

12% have lost business as a result of technology issues

20% of meetings overrun due to equipment issues

For more information see:
The Meeting Room Stress Test

4

But the right technology will deliver many benefits

9 in 10 feel different technology could help reduce stress in the meeting room

44% want technology that is wireless with no cables to connect

51% say technology that works with the touch of a Button would help to create stress-free meetings

37% believe being able to easily change presenters would help

44% would benefit from being able to share from any device

For more information see:
The Meeting Room Stress Test

XMS Cloud

value

▪ **Configuration & Device Management**

Your ClickShare base-unit connects securely to the XMS Cloud platform from which you are able to remotely activate, configure and manage your devices.

▪ **Device Status & Notifications**

At a glance, you can verify the status of your devices from the dashboard. You will receive notifications when your firmware is out of date or when one of the units requires your attention so you can react quickly before the users are even aware.

▪ **Statistics & Reporting**

Based on historical usage data, we'll provide a personalized report about the availability and the utilization rate of your ClickShare base-units. It will demonstrate the user adoption and the ROI of your collaboration experience.

Technology in education
Shaping of digital transformation in education

BARCO

Education is transforming

There's more focus on student skills

We're moving from passive to interactive learning

Learning is being blended to improve outcomes

Teachers are teaching across multiple locations

We provide students with ...

Collaboration

allow them to share content on whatever device they have with them

Interactivity

Through the quizzes, polls and other features

Engagement

Consistent, high quality learning experiences in the classroom, across the campus and beyond

And we provide IT with ..

- BYOD sharing in the classroom that is flexible and simple to use

- An interactive cloud-based solution for classroom-based and remote learning

- Technology that transforms the learning experience yet is easy to setup and simple to scale

- The opportunity to manage all kinds of hardware from one central location

New learning spaces and setups are starting to proliferate

About Barco

Barco designs technology to enable bright outcomes around the world. Seeing beyond the image, we develop sight, sound, and sharing solutions to help you work together, share insights, and wow audiences. Our focus is on three core markets: Enterprise (from meeting and control rooms to corporate spaces), Healthcare (from the radiology department to the operating room), and Entertainment (from movie theaters to live events and attractions). We have a team of 3,500 employees, located in 90 countries, whose passion for technology is captured in 400 granted patents.
