Digital Employee Experience

Den samlede **sum** af digitale transaktioner i arbejdsmiljøet

En strategi, der løbende forbedrer medarbejdernes teknologiske **oplevelse**

En stærk IT-strategi definerer fundamentet DEX sikrer, at folk kan **trives** i den

**Hvordan er
vores medarbejderes
oplevelse?**

One platform to transform your workforce experience

The future of work is personal and hybrid work is here to stay

Employees are working from
wherever they want...

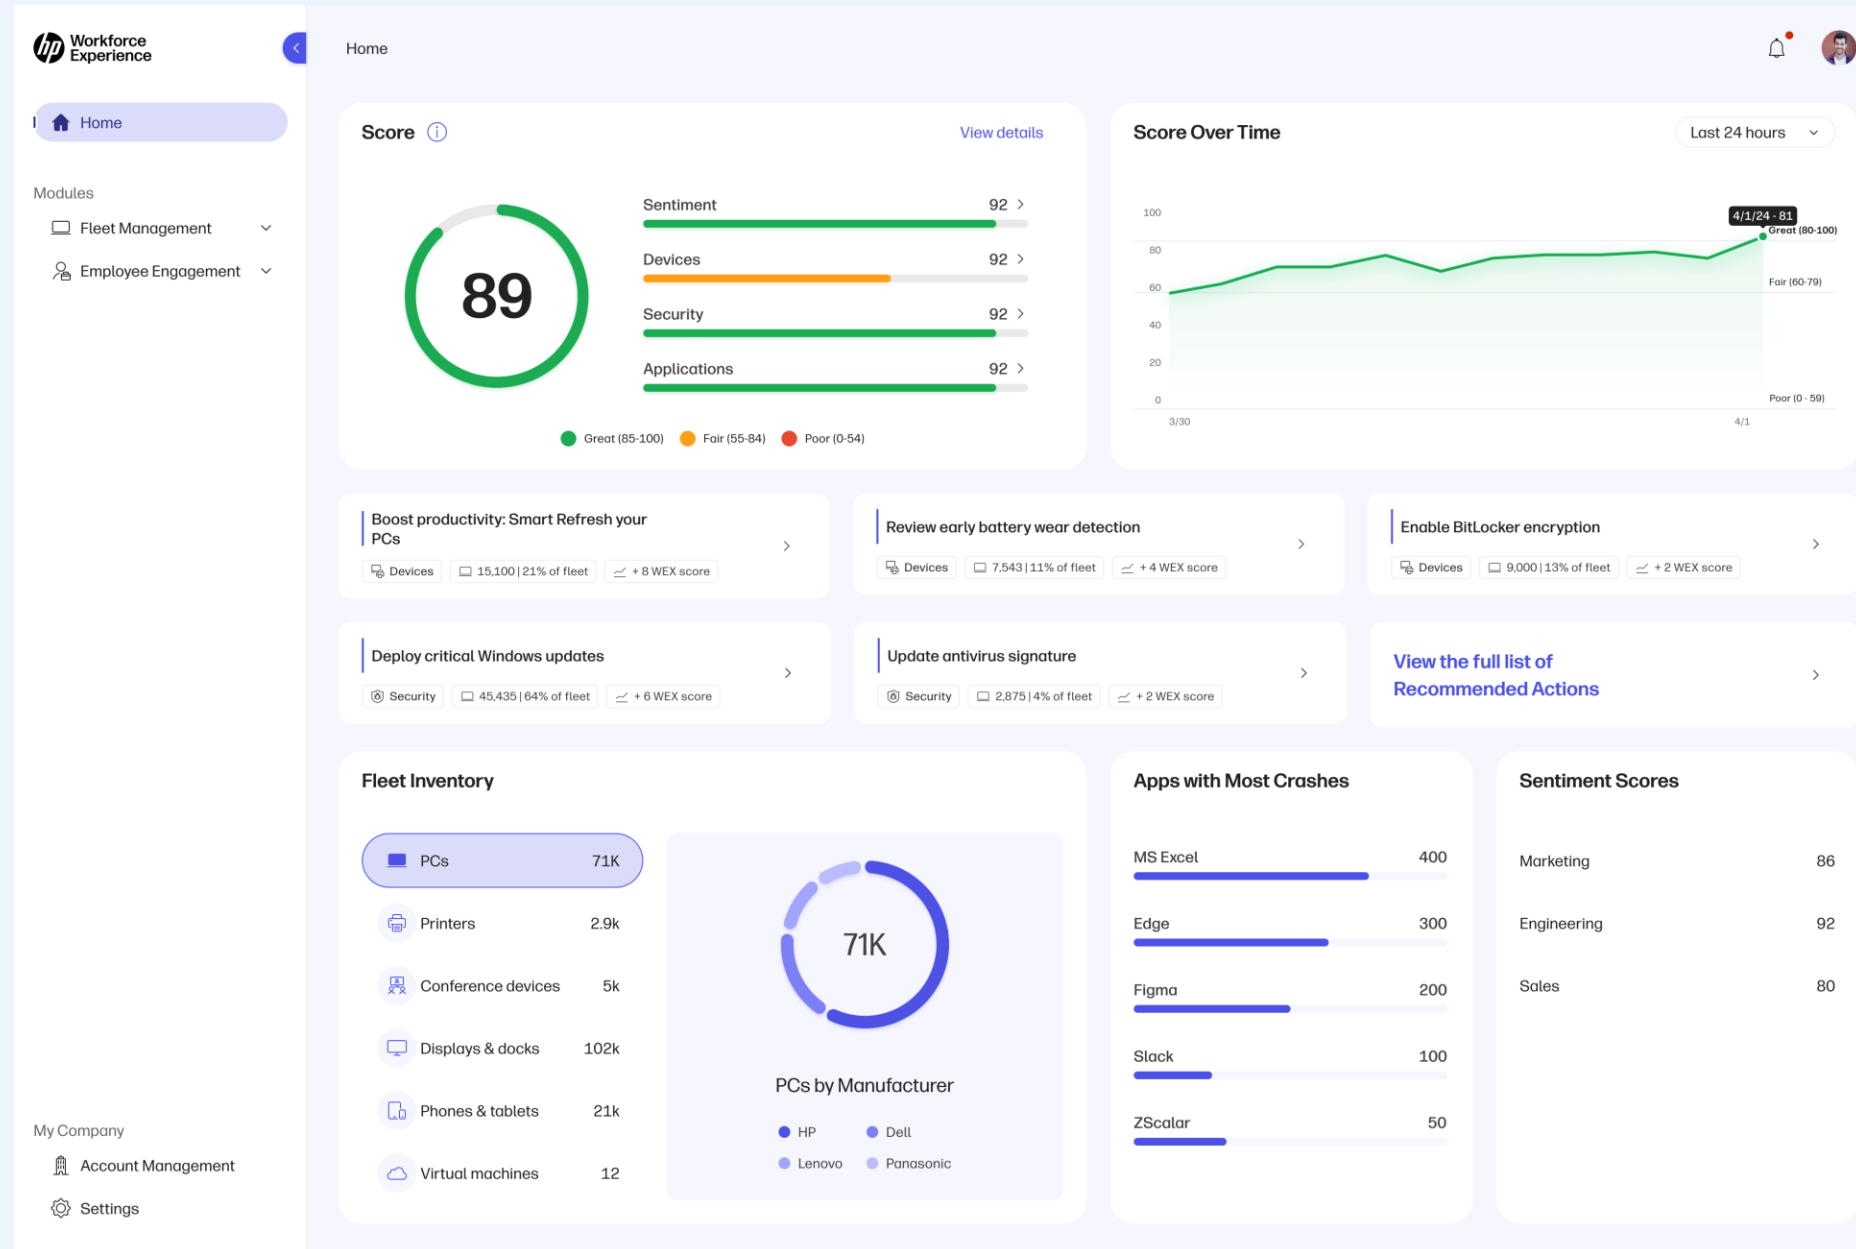

Across more devices than
ever before...

Expecting a seamless
and secure experience,
every time.

76% of Fortune 500 execs believe that how their teams work is more important than where they work. *Atlassian*

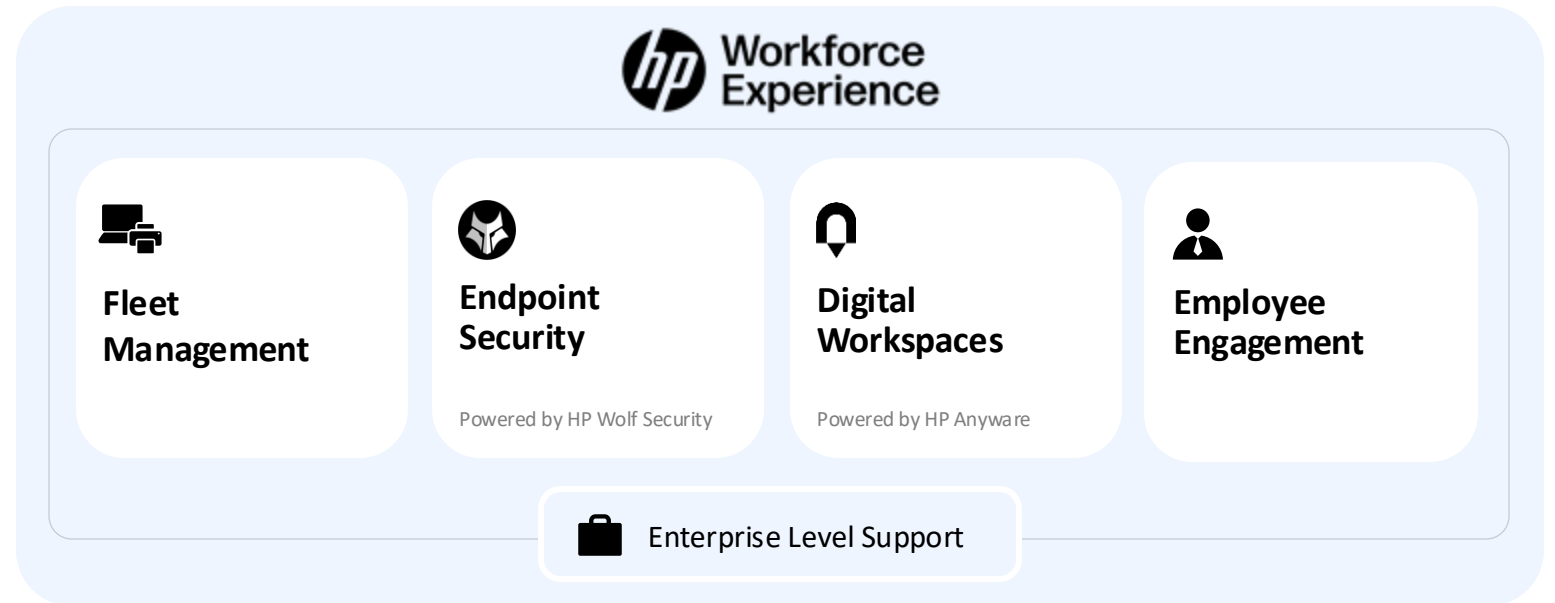

Every employee.
Every device.
Optimized.

Transform your workforce experience

A Single Pane of Glass

Device and OS agnostic cloud-based solution to enhance workforce productivity. One consolidated platform that you can tailor the solution to your needs.

Optional Add-Ons

Why HP Workforce Experience Platform

Transform your digital experience

by better connecting your employees and their devices

Reduce IT spend and improve support

by providing proactive support and streamlining the process that weighs IT helpdesks and employees down

Improve security and compliance

by securing devices, applications, and documents across workspaces

Enhance operations and efficiency

by offering a scalable ecosystem that autonomously orchestrates the workplace experience

ATEA Nordic Services

- **Accelereret onboarding**
- udrulning af klient, baseline-dashboards, KPI'er og governance fra dag ét.

- **Integration & licenser**
- **Standard på tværs**
– Centralt koncept
- **Rådgivning & QBR**
-månedlige rapporter og kvartalsvise reviews

End-to-end eksempel

Problem:

Teams-møder hakker – særligt mandag formiddag.

- **Opdag & diagnose:**
WXP korrelerer lav MOS med **Intel Wi-Fi-driver 22.200 + AP-firmware Y** (72 % af dårlige kald).
- **Handling (one-click):**
Ring 1 (50 enheder) → udrul **Wi-Fi-driver 22.230 + QoS-policy**; AP-firmware opdatering planlagt.
- **Kommunikation:**
Kun berørte brugere får besked i klienten: *“Vi forbedrer din mødekvalitet – genstart efter arbejdstid.”*
- **Måling (48 t):**
MOS +0,7, –62 % Teams-tickets, –41 % CPU-spikes.
- **Skalering:**
Auto-promote til **Ring 2–3**; automatiseret før/efter-rapport til ledelsen.
- **Guard-rails:**
Stop/rollback hvis **22.200** registreres; push korrekt version automatisk.
